

# LIGHT BOX

## INDOOR

Example type: T-L 1  
Panel recommendation: paper placards of the standard size DIN A1

Back-lit presentation of A1-sized graphic material ensures it gets the attention it deserves.

Made for indoor, wall-mounted application, the light box consists of a polystyrene casing and a hinged display frame made of anodized aluminium. Power is supplied via a 2 m cable fitted with a plug. The hinged frame enables graphic material displayed behind the transparent protective sheet to be quickly and easily changed.

Polished chrome-plated corners

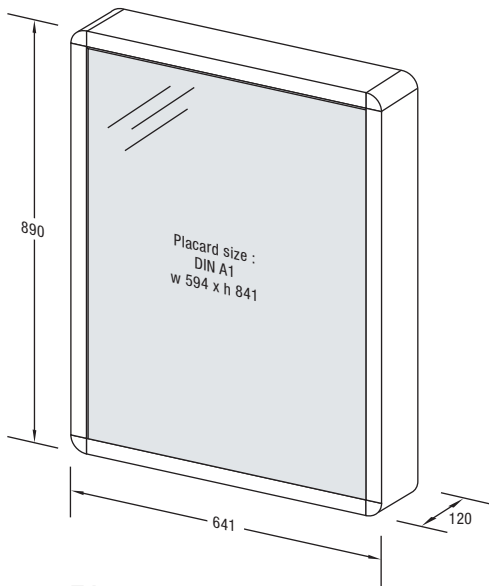

Clip profile

Integrated illumination

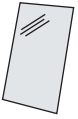

## BASIC MODULES:

**T-L 1**  
Light box (indoor)

---

## ACCESSORIES:
